TRACKED CARRIERS

4000 PRO

The new 4000 PRO from Tracked Carriers offers an unrivalled method of transporting heavy goods through confined spaces. At only 1m wide, the 4000 PRO has a maximum capacity of 4,000kg and can climb gradients up to 45° with a reduced load.

The 4000 PRO has remote-controlled platform rotation and extendable support bars fitted as standard. This enables the user to configure the platform and safely rotate loads to improve manoeuvrability in tight areas, and to enable precise load positioning without any effort.

As with all PRO models, this machine features gradient monitoring to increase safe operation when working on steep inclines, information feedback to the remote control, and a 24v auxiliary output to power certain accessories.
